Air Tools

Tools for Use in Potentially Explosive Environments

Impact Tools, Drills, Saws

- ATEX-compliant
- enhanced safety features
- highly durable
- simple operation

Our ATEX-compliant air tools are economical, effective and ergonomic and offer an outstanding longevity for any application in an industrial environment that is also considered to be explosion hazardous, such as above and below-ground mining, while drilling for oil or in the oil-processing industry, as well as operations on gas and oil-pipelines.

Tools for Use in Potentially Explosive Environments (Impact Tools, Drills, Saws)

ATEX-compliant

Our ATEX-compliant tools conform to the highest requirements for explosion hazardous environments.

Enhanced safety features

Our tools are designed for the use in potentially explosive environments and for industrial applications with the highest safety requirements.

Highly durable

Due to the robust construction, the tools are well-suited for the use in 24/7 industrial areas and assures a high reliability.

Simple operation

Our tools are simple to operate for many different processes and applications.

3-step torque adjustment

Our impact tools are equipped with a 3-level power limiter, where the first setting is the max.torque, the second setting reduces the torque to 50% and the third setting corresponds to 30% of the max. torque.

SPECIFICATIONS - DRILLS

Rock Drills - right-rotated; the machine incorporates a central water-flush features that reduces the dust generation caused by drilling. For manual drilling equipped with a drill bit (not supplied with the tool), for soft- and semi-solid soil, slate, clay, or other soft rocks located in explosive hazardous environments.

Chain Saw - for the cutting of different materials for varying applications in heavy-duty 24/7 industrial operations, such as the machine building- or in the wood-fabricating industry; the saw can also be used in explosion hazardous environments

SH 150-180BX

- High power output, high cutting speed
- With integrated hand-safety, safety chain brake
- Automatic chain lubrication
- Possible motor speed regulation by lever
- Simple to operate and maintain

SPECIFICATIONS - STRAIGHT SAW

Jig Saw - for hand-guided cutting of different materials, especially metals and plastics e.g. in the machine building, in the wood-fabricating industry and in explosion hazardous environments

- The saw can be equipped with an integrated clamping device which allows deeper cutting - up to 300 mm (11.81 in)
- Integrated speed regulator assures perfect and constant conditions
